MUCCINI S.A. DE C.V.

Complete, constantly evolving
range of goods and services
to the beverage industry

RFC

WATER FILLERS

Are designed for automatic rinsing, filling (water, tea, and juices) and capping of glass or PET bottles. Range 24 to 96 valves, capacity of filling from 80 bottles of 0,5L to 1000 bottles of 0,5L per minute.

Linker Europa Sp. z o.o. has over 15-year experience in the production and sale of bottling equipment. It is the manufacturer of bottling equipment in Poland with such a wide range of activity (Europe, North and South Americas, Asia, Australia, Africa). As a result of engineering and high quality of production we are suppliers of bottling line equipment to beverage producers such as Coca Cola, Pepsi Cola.

Linker Europa supplies complete bottling lines designed to meet the requirements and needs of the customer. Apart from the machines and accompanying equipment the company offers spare parts off the shelf insuring fast delivery.

Our design services provide engineering plans and offer technical advice locating the production line in specific conditions as well as in the selection of proper machines and equipment.

Each project is preceded by deep analysis of the customers' requirements, which, among other things, includes: inspection of their infrastructure and preparation plans for present and future production.

Linker Europa provides rapid response field services by our skilled technicians at substantially lower cost than our competitors.

The basic offer includes:

Monoblocks for rinsing, filling and capping:

- water fillers (RFC);
- pressure gravity fillers (PG-RFC);
- isobaric (carbonated) fillers (P-RFC);
- 5-gallon (MF-BPH);
- Mix-processors (carbo-coolers)
- palletizers, depalletizers
- case packing machines,
- depacking machines

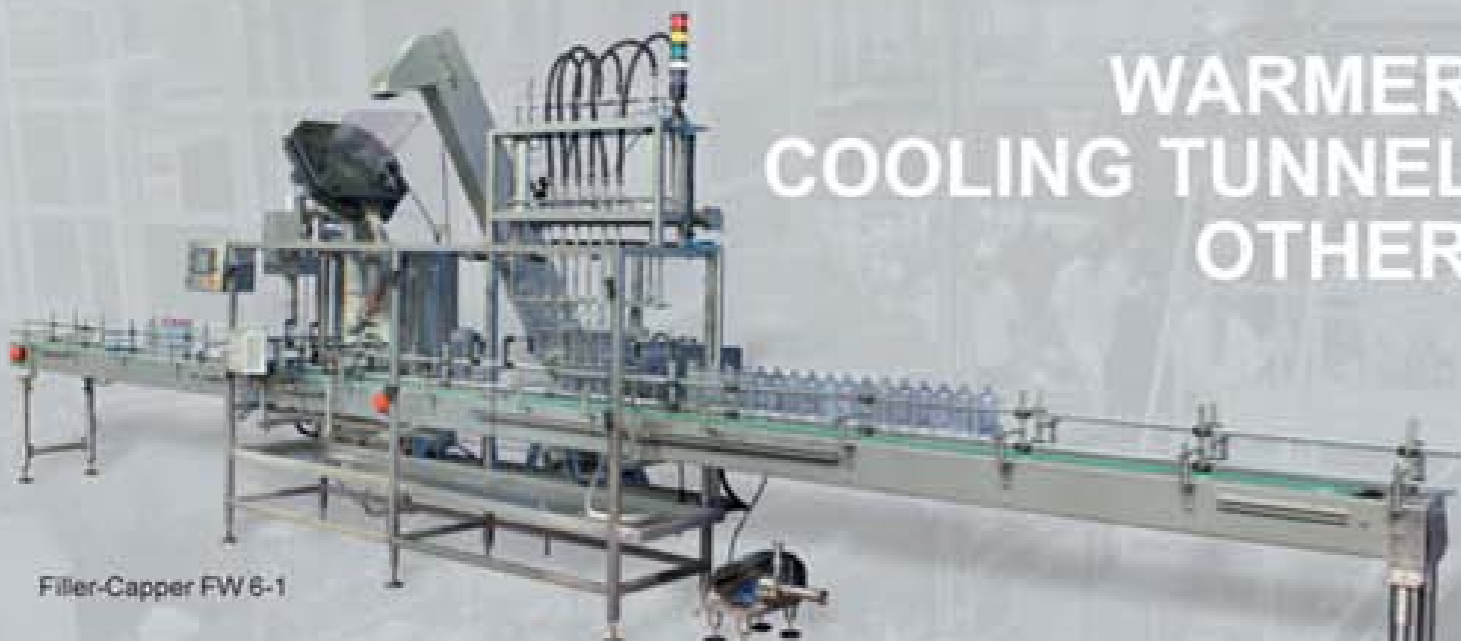

Bottle conveyors systems:

- air, empty or full bottle,
- case conveyors systems,
- gravity,
- roller conveyors,
- matt conveyors

WARMERS COOLING TUNNELS OTHERS

P-RFC ISOBARIC FILLERS

Filler-Capper FW 6-1

Warmer W-300

Cap Feeder

Cooling Tunnel CT-23

Free Standing Rinser RR40

Isobaric fillers P-RFC are designed for filling carbonated beverages into PET and glass bottles. The cycle of operation of machines includes rinsing, filling and capping/crowning. Size range 24 to 96 filling valves with capacity up to 900 bottles (0,5L) per minute.

PG-RFC

PRESSURE GRAVITY FILLERS

Pressure gravity fillers are designed to fill beverages (water, juice, tea, wine, liquor, etc) into PET and glass bottles. Cycle of operation includes rinsing, filling and capping. Size range 18 to 84, capacity even up to 700 bottles (0,6l) per minute. Maintenance exact filling height.

PALLETIZERS, DEPALLETIZERS

For automatic palletizing of cardboard boxes or plastic cases and softpacks onto the pallets Capacity, the way of palletization (low palletization, high palletization) and the type of palletized product strictly depend on Customers' needs and preferences. Capacity: up to 45 cpm.

Depalletizers are designed for automatic or semi-automatic unloading of pallets of different dimensions, on which there are placed cans, glass bottles or PET bottles. Their capacity and type of depalletization are adjusted to Customers' preferences and needs.

CONVEYORS

Bottle conveyors conveying different types of products between machines within the bottling line. Depending on the type of conveyor needed we offer air conveyors (applied in conveying of empty PET bottles), cable conveyors (for conveying empty cans), table top conveyors (for conveying empty or full cans, PET bottles), case conveyors for carton plastic cases and full or empty pallets conveyors.

MF-BPH 5 GALLON EQUIPMENT

Consist of a tunnel for washing, disinfection and rinsing and the section of filling and capping 3-5-gallon bottles. Depending on Customers' needs they allow achieving the capacity from 200 to 1600 of bottles per hour. Metering control of liquid assures exact volume in the bottle.

CARBO-COOLERS

MIX-PROCESSORS

Carbo-coolers designed for cooling, blending, carbonating and mixing the beverage. Ammonia/Freon, glycol, refrigeration systems.
Capacity: 5000 LPH to 30.000 LPH.

MUCCINI S.A. DE D.V.

PACKING / UNPACKING MACHINES

Packing machines for packing bottles or cans in all types of cartons, trays, plastic containers.
Capacity up to 45 cpm.

For unpacking bottles packed in plastic cases or cartons. We offer two types for half and full depth.
Capacity up to 45 cpm.
